Coonambro Communications Upgrade

TransGrid, the NSW transmission network operator, is proposing to construct a new communications site at Mt Coonambro, Cookamidgera NSW.

The project involves building a new communications structure and communications shelter.

TransGrid is currently undertaking environmental studies for the project, with construction expected to commence in mid-2010.

This project is vital to assist TransGrid in remotely operating its electricity network, enabling power to be more reliably and safely delivered to the region.

For further information, contact TransGrid or SMEC (environmental consultant) via the project hotline:
