

Environment Policy

TransGrid is committed to conducting its activities and services in a manner that protects the environment, prevents pollution and meets compliance obligations. TransGrid implores all employees and contractors to stop and consider the potential impact to the environment from their activities.

“We promote continuous improvement in environmental management”

Paul Italiano
Chief Executive Officer
Approved:
January 2018

The Environment Policy covers all activities and services undertaken by TransGrid including the planning, building and operation of infrastructure, ongoing management of these assets and their decommissioning.

We aim to enhance our systems and processes in a manner that promotes continuous improvement in environmental management and which will lead to the achievement of good industry practice.

In meeting these commitments, TransGrid:

- > Maintains an Environmental Management System that provides the framework for setting and reviewing our environmental objectives and targets, including the implementation, monitoring and review of these objectives and targets, as well as facilitating continuous improvement in environmental performance
 - > Continues to develop systems that recognise sensitive environmental and cultural sites on or near our infrastructure, and provides processes to manage our activities with the aim of preventing environmental harm or adversely impacting the environment
 - > Integrates environmental management considerations into the planning, design, siting, construction, maintenance, operation, decommissioning and disposal of all TransGrid assets
- Provides environmental training, assessment and authorisation under our Environmental Management System to employees and contractors to enable them to perform their duties in an environmentally sensitive manner
 - > Engages with the community, customers, employees, government and other stakeholders regarding potential environmental or cultural impacts associated with our plans and activities
 - > Pursues opportunities to maximise resource efficiencies and reduce the generation of waste through reduction, reuse and recycling programs
 - > Identifies, sets and monitors realistic environmental performance measures and communicates them to all employees and stakeholders.
