

**Work Notification** | January 2026

Continuing work at Gregadoo, Book Book, Keajura, Tarcutta, Humula and Oberne Creek

REF: HLW-105

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections. The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in joint venture as HumeLink West.

**About the work**

We are continuing work at Gregadoo, Book Book, Keajura, Tarcutta, Humula and Oberne Creek. This includes building the Gugaa 500 kV substation, upgrading the existing Wagga 330 kV substation, building transmission towers and stringing transmission lines.

Main construction activities will be ongoing until project completion in late 2027 and will include:

- Excavating with piling rigs and excavators for the tower foundations
- Concreting and reinforcing foundations
- Assembling and lifting towers into place using cranes
- Stringing power conductor lines across the towers
- Using drones and helicopters to string towers
- Vegetation clearing, excavation and earthwork
- Heavy vehicle movements to transport construction machinery and other deliveries to work sites
- Survey, investigation and monitoring of biodiversity, heritage, noise, dust and vegetation including drone and aerial photography
- Equipment testing and operation.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government Major Projects website [planningportal.nsw.gov.au/major-projects/projects/humelink](https://planningportal.nsw.gov.au/major-projects/projects/humelink).

**What you can expect**

There will be increased construction vehicles and machinery across the project area during the work. The type of plant and equipment you can expect to see are generators, elevated work platforms, telehandlers, piling rigs, concreting trucks, cranes, forklifts, water carts, excavators with attachments, compactors, earth moving equipment, drones, drone cameras, helicopters, heavy and light vehicles.

We will make every effort to minimise impacts by:

- Minimising the number of machines and vehicles to be used and ensuring all machinery is maintained and serviced
- Turning off machinery and vehicles when not in use and fitting equipment with devices or shielding to minimise noise
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.

Traffic control will be in place when required, including temporary traffic lights, variable message signs, boom gates, signage, speed reductions and stop/slow traffic management. Please keep to the signposted speed limits, follow the direction of traffic controllers, and drive to the conditions such as slowing down in wet weather and poor visibility. For the latest traffic updates, visit [livetraffic.com](http://livetraffic.com) or download the app Live Traffic NSW.

## When we are working

Standard working hours are 7am to 6pm, Monday to Friday and 8am to 1pm on Saturdays.

Work out of these hours will take place at locations where impacted properties and landowners have been separately notified. Environmental surveys including flora and fauna monitoring will be undertaken 24/7 to prepare for work and for monitoring throughout construction.

## Where we will be working

Work will be between access points and the transmission line, shown on the map over the page. See the interactive map for all work locations at [transgrid.com.au/humelink#Project-map](http://transgrid.com.au/humelink#Project-map).

## Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning which might impact you. If you have any questions about the project, please contact our Community and Stakeholder Engagement team on **1800 317 367** or [humelink@transgrid.com.au](mailto:humelink@transgrid.com.au).

We welcome your feedback on the HumeLink West JV Community Communications Strategy. Visit [transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs](http://transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs) to view the strategy, and connect with us to have your say.

### Stay up to date with our work

Please head to [transgrid.com.au/HumeLink](http://transgrid.com.au/HumeLink) or scan the QR code to subscribe to regular updates, and for more information on the project.

## Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.
