

Powering Sydney's Future

POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

Cable installation: Byron Street, Campsie to Harmony Street, Ashbury

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at www.transgrid.com.au/psf.

We thank you for your patience during our work so far. The next stage of work in the area involves installing both electricity cables and communications cables:

- From next **Saturday, 19 June**, we will start to install communications cables at a recently installed ancillary pit at **Lindsay Street, Campsie**. This work will be near the cable pulling pit, which will be used to assist with feeding the electricity cables through the underground conduits.
- From **Tuesday 22 June**, we will open up the already installed joint bays on **Byron Street, Campsie** and **Harmony Street, Ashbury**, in readiness to pull the electricity cables through the underground conduits.
- From **Wednesday 30 June**, we will start work to install the underground electricity cable between **Byron Street and Harmony Street**. The cable drum behind a large delivery truck will be parked adjacent to the joint bay on Harmony Street. The drum is around 4.5 metres wide when transported on the truck, but six metres wide when cable is pulled into the conduits. The truck will arrive before the morning peak time and turn off its engine until 7am. It will leave after cable installation has ended.
Cable installation will take up to **three weeks** to complete, weather permitting. Please refer to the map overleaf.

Work activities

- > Installing temporary fencing and safety barriers around the work site.
- > Tree trimming may be required to create a safe distance from plant and equipment (directed by a qualified arborist).
- > Re-excavating the already installed joint bays (Byron Street and Harmony Street).
- > Checking the already installed underground conduits (pipes) between each joint bay and cleaning them if necessary.
- > Lifting the lid off the ancillary pit (Lindsay Street) at start of work, and lifting it back into place when work is done.
- > Digging a trench about two metres wide using an excavator and installing conduits (pipes).
- > Excavating small pits (six metres long by three metres wide) and installing cable pulling equipment.
- > Pulling electricity cable through underground conduits at joint bays in Byron Street and Harmony Street; and installing communications cable at the ancillary pit in Lindsay Street.
- > Using a pump/vacuum truck to remove water from the joint bays / cable pit as required.
- > Any localised nature strip restoration work that may be necessary.

Work hours

Working hours are **7am – 6pm, Monday to Saturday**.

How will the work affect you?

- > **Byron, Lindsay, Harmony and Malleny streets** will remain open to local residents under traffic control.
- > **Byron, Lindsay, Harmony and Malleny streets will be temporarily closed to through traffic** during work hours.
- > Traffic detours and traffic control will be in place for the safety of workers and road users.
- > The work will generate some noise, including a generator at each cable pulling location. We will make every effort to keep noise to a minimum.
- > There will be a temporary loss of street parking while work is in progress.
- > Road users may experience temporary delays to access local properties. If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.
- > An alternative route will be provided wherever any diversions or temporary closures of pedestrian are required.

Location of cable work

What's next

Following cable installation work between Byron Street and Harmony Street, more cables will be installed in the next sections of the conduits and a second joint bay will be installed at Harmony Street. Then, these cables will be joined together inside the joint bays, and the road surface temporarily restored. We will keep you advised of upcoming work activities.

Once all work is complete in the area and the cable is installed and tested, we will permanently restore the road surface.

Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at psf@transgrid.com.au.

For an interpreter please call **131 450** and ask them to call TransGrid on **1800 955 588**. The interpreter will then assist you with translation.
