

Tumbarumba Pool Amenities Upgrade

Snowy Valleys Council

Snowy Valleys

Funding requested: \$200,000

Summary: The project involves the upgrade of the Tumbarumba pool amenities to include all accessible toilets and facilities in line with current standards. The facility has just been upgraded and allows for entry into the pool via a compliant disabled access ramp, however the facilities do not have change or toilet provisions for this important part of the community.

Community value: The inclusion of All Accessible Facilities at the Tumbarumba Pool will finalise a multi-year approach by SVC towards allowing for increased patronage and access to its aquatic facilities. The current facilities are not compliant with current standards and need to be upgraded with appropriate features to ensure their safety and usability by all patrons.
