

Work Notification | April 2026

Temporary road closures Boiling Down, Ashfords, and Ivydale roads, Gregadoo

REF: HLW118

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections. The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in a joint venture as HumeLink West.

What work is happening

From Tuesday 4 May work will start to build the scaffold and supporting structures needed to string the power conductor cables across Boiling Down, Ashfords and Ivydale roads, Gregadoo. This work will occur through to July 2027. This timeframe will also include removing the existing power line and towers. Please see the map on page 3 for work areas.

Activities include:

- Transporting machinery and supplies to work areas
- Vegetation and tree clearing within areas affected by the work
- Setting up brake and winch sites within properties
- Building scaffolding inside property boundaries on both sides of Boiling Down, Ashfords and Ivydale roads
- Installing safety netting between the scaffold structures to prevent anything falling onto the road during the stringing activities
- Stringing conductor cables between the towers using drones and at times helicopters may be used
- Ongoing surveys to monitor biodiversity, heritage, noise, dust and vegetation, and drone and aerial photography
- Equipment testing and operation.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government Major Projects website planningportal.nsw.gov.au/major-projects/projects/humelink.

What you can expect

- There will be increased number of vehicles and machinery in the area
- Intermittent short road closures for Boiling Down, Ashfords and Ivydale roads when scaffolding, safety netting and cables are being installed and there will be similar intermittent road closures when the netting, cables and scaffolding is removed
- Most traffic delays should be between three to five minutes, however there may be times when traffic could be delayed for up to 15 minutes
- Access to the Waste Management Centre and ReLove It shop on Ashfords Road will be maintained
- Access to resident's properties will be maintained.

- At times motorists accessing Ivydale Road from Gregadoo East Road may be directed to use Ashfords Road.

Equipment we use includes generators, elevated work platforms, telehandlers, piling rigs, concreting trucks, cranes, forklifts, water carts, excavators with attachments, compactors, earth moving equipment, drones, helicopters, drone cameras, heavy and light vehicles.

We will make every effort to minimise impacts by:

- Minimising machines and vehicles used, ensuring they are maintained, turning them off when not in use, and fitting devices or shielding to reduce noise
- Monitoring dust, noise and vibration and changing our work if required.

Traffic control

Traffic control will be in place, including temporary traffic lights, variable message signs, boom gates, signage, speed reductions and stop/slow traffic management. Please keep to the signposted speed limits, follow the direction of traffic controllers, and drive to the conditions such as slowing down in wet weather and poor visibility. For the latest traffic updates, visit livetraffic.com or download the app Live Traffic NSW.

When we are working

Standard working hours are 7am to 6pm, Monday to Friday and 8am to 1pm on Saturdays.

Work out of these hours will take place at locations where impacted property owners have been separately notified.

Environmental surveys including flora and fauna monitoring will be ongoing 24/7 for monitoring the environment throughout construction.

Where we are working

Work will be between access points and the transmission line, as shown in the following map. See the interactive map for all work locations at transgrid.com.au/humelink#Project-map.

Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning which might affect you. If you have any questions or want to provide feedback, please contact our Community and Stakeholder Engagement team on **1800 317 367** or humelink@transgrid.com.au.

Stay up to date with our work
