

Work Notification | February 2026

Working hours – Sharps Creek

REF: HLW-114

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections. The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in joint venture as HumeLink West JV.

Working hours, February to May 2026

Construction work is ongoing to build transmission towers and string transmission lines, and work is continuing to complete access points and tracks required for use during transmission line construction.

During tower construction, some work may start at 5am to allow sufficient time and optimal conditions for concrete pours to be completed on that day, helping to ensure the structural integrity of the foundations.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government Major Projects website planningportal.nsw.gov.au/major-projects/projects/humelink.

What you can expect

There will be an increased number of construction vehicles and machinery across the project area during construction work. The type of plant and equipment you can expect to see are generators, elevated work platforms, telehandlers, cranes, forklifts, water carts, excavators with attachments, compactors, earth moving equipment, drone cameras, concrete agitator trucks, heavy and light vehicles.

We will make every effort to minimise impacts by:

- Minimising the number of machines and vehicles to be used and ensuring all machinery is maintained and serviced
- Turning off machinery and vehicles when not in use and fitting equipment with devices or shielding to minimise noise
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.

Traffic control will be in place when required, including temporary traffic lights, variable message signs, boom gates, signage, speed reductions and stop/slow traffic management. Please keep to the signposted speed limits, follow the direction of traffic controllers, and drive to the conditions. For the latest traffic updates, visit livetraffic.com or download the app Live Traffic NSW.

When we are working

During pouring of the concrete for tower foundations, work may take place between 5am and 8pm, Monday to Sunday from February to May 2026. Low impact activity to support construction of the foundations and towers may also occur in this period.

You are being notified because a noise assessment identified that this out of hours work may be audible at your property. The works carried out during extended hours would be similar to those carried out during standard construction hours, with moderate to low noise impacts.

Standard working hours are 7am to 6pm, Monday to Friday and 8am to 1pm on Saturdays. Work outside of these hours will take place at locations where impacted properties and landowners have been notified.

Environmental surveys including fauna and flora monitoring will be undertaken 24/7 to prepare for work and for monitoring throughout construction.

Where we will be working

Work will be between access points and the transmission line, as shown in the following map. See the interactive map for more information including access tracks at transgrid.com.au/humelink#Project-map

Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning that might impact you. If you would like to receive our work notifications via email, or have any questions about the project, please contact our Community and Stakeholder Engagement team on **1800 317 367** or humelink@transgrid.com.au.

You can also visit us at the Snowy Valleys Resilience Hub, 37 Pioneer Street Batlow, open **Monday to Friday, from 9am to 5pm**.

We welcome your feedback on the HumeLink West JV Community Communications Strategy. Visit transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs to view the strategy, and connect with us to have your say.

Stay up to date with our work

Please head to transgrid.com.au/HumeLink or scan the QR code to subscribe to regular updates, and for more information on the project.

Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.
