## January 2023

---

Welcome to the January EnergyConnect newsletter. In this edition:

- New energy superhighway driving ahead
- Another milestone as tower materials arrive
- Landowners back clean energy transition
- Husband and wife among our growing team
- Project workforce settles into camp life
- Keep up to date on construction activity

### **New energy superhighway driving ahead**

Construction of EnergyConnect is powering ahead at Buronga in western NSW. The \$1.8 billion project will allow the sharing of energy between three Australian states for the first time, enable integration of renewable generation, lower the cost of wholesale electricity, and help achieve national emission reduction targets. Current works include building one of the most complex substations in the Southern Hemisphere.

## Another milestone as tower materials arrive

EnergyConnect has passed another key milestone with the arrival of the first shipments of tower construction materials, including structural steel and drums of guy wire, to help assemble the towers on Australia's largest transmission project. Construction involves building 1500 new transmission towers requiring 30,000 tonnes of steel.

## Landowners back clean energy transition

Landowners are crucial to delivering Australia's clean energy future, including the \$1.8 billion EnergyConnect project. There is no transition without transmission and landowners are helping us to build the energy superhighway by accommodating critical transmission infrastructure on their properties.

## Husband and wife among our growing team

Hundreds of workers are coming from across Australia to help build EnergyConnect, including engineers, logistics and material managers, labourers and plant operators. The many faces behind the \$1.8 billion project include a husband-and-wife team working for principal contractor SecureEnergy Joint Venture.

## Project workforce settles into camp life

SecureEnergy Joint Venture workers have moved into the first accommodation camp for EnergyConnect and are enjoying their home away from home. The purpose-built camp near Buronga houses 340 workers and provides quality facilities and services including a gym, recreation room, wi-fi and mess hall. Importantly, the camp reduces worker travel times and fatigue and eases pressure on local accommodation.
