Jobs and traineeship opportunities on HumeLink East

We are committed to investing in local communities, and providing tangible and meaningful benefits, including jobs and skills development, on the HumeLink East project.

If you are interested in working on the project, please submit an Expression of Interest (EOI) via the QR code below so we can keep in touch about new opportunities.

For current opportunities on the HumeLink East project, visit our Joint Venture partners, ACCIONA and Genus websites and search HumeLink East.

We are also committed to offering training and educational opportunities for those wishing to join our workforce.

In addition to our existing jobs, we will be offering many pre-employment programs and traineeships throughout the project duration. Please speak to a member of our team for more information on these.

Procurement opportunities on HumeLink East

We're focused on creating opportunities for local industry and working with small and medium-sized enterprises to deliver the project.

As we progress our works program, our core focus is establishing sustainable supply chains and delivering tangible benefits for the communities in which we work.

HumeLink East has established a procurement and resourcing relationship with Industry Capability Network (ICN) and i3net to engage with local and regional suppliers to support a wide range of project activities.

Find current work packages via the ICN Gateway and the HumeLink East portal via the QR code below or at:

Community investment

We want to deliver tangible benefits for the communities in which we work through our community investment scheme.

What is community investment?

Community investment is about supporting local communities in ways that matter—whether that’s funding local initiatives, supporting social programs, or simply listening and understanding what’s important to you.

Why does it matter?

Strong communities are built on trust and collaboration. By engaging with local voices, we aim to understand community priorities and explore ways to support positive outcomes.

We want to hear from you!

We’re gathering insights from the community through a short survey. Your feedback will help us better understand local needs and challenges.
