

## Work Notification | April 2026

### Steel deliveries to Dalton, Blakeney Creek, Broadway, Bango, Jerrawa, Bannister

HumeLink is one of NSW largest energy infrastructure projects, with about 365 kilometres of new 500kV transmission line which will connect Wagga Wagga, Bannaby and Maragle. The eastern portion between the existing Bannaby substation and Wondalga is being delivered by Acciona Construction Australia Pty Ltd and Genus Infrastructure (NSW) Pty Ltd in a joint venture as AG JV HumeLink East.

#### Tower steel deliveries in the Dalton, Blakeney Creek, Broadway, Bango, Jerrawa and Bannister area

Convoys of heavy vehicles are underway to deliver shipments of steel for transmission towers for HumeLink East. From **early April to late August 2026** we will be delivering steel to sites near **Dalton, Blakeney Creek, Broadway, Bango, Jerrawa and Bannister**. We are also continuing work to construct access points and tracks and foundations.

#### What to expect

During construction there will be increased heavy vehicle and semi-trailer movements as steel material components are delivered to site so towers can be assembled and erected.

B-double and/or semi-trailers with prime movers will travel from Sydney and along the Hume Highway to tower site locations. There may also be stopping points where individual trailers will be transferred to be delivered to tower site locations. Up to eight trailers of steel materials will then be delivered across different sites each day.

- **Work hours:** construction works take place during daylight hours:
  - 7:00am to 6:00pm Saturday, Sunday and public holidays
  - truck deliveries will take place between 7:00am and 6:00pm
  - if nightwork or out-of-hours work is required, we will contact all impacted landowners beforehand.

#### Traffic and Environment

- **Noise:** We will do everything we can to minimise any noise impacts such as turning off equipment and vehicles when they are not being used.
- **Additional vehicle movements:** The table below sets out the roads that will be used for steel and stringing material deliveries to Dalton, Blakeney Creek, Broadway, Bango, Jerrawa and Bannister.

<b>Dalton/Broadway</b>	Walsh’s Road, Rye Park Road
<b>Bannister</b>	Prices Lane, Bannister Lane
<b>Blakeney Creek</b>	Rugby Road, Felled Timber Road
<b>Bango</b>	Bushes Road, Fairy Hole Road
<b>Jerrawa</b>	Stink Pot Road

---

## Upcoming construction activities

Once the steel materials have been delivered to site, teams will then begin work to assemble and erect the transmission towers.

- **Construction activity** in the area will include:

- the use of excavators and heavy machinery for earthmoving and clearing
- machinery and equipment will generate dust, noise and vibration
- excavation with piling rigs to drill and prepare tower foundations
- concrete work and pouring to prepare tower foundations
- large cranes will be used to assemble and lift tower sections
- trucks delivering equipment and materials
- ongoing surveys and monitoring of biodiversity, heritage, noise, dust and vegetation including aerial surveys by drone.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government [Major Projects website](#) planning portal.

*Example steel delivery near Adjungbilly*

## Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning which might impact you.

If you have questions or concerns about any of the above, please contact our Community and Stakeholder Engagement team on **1800 317 367** or by emailing [humelink@transgrid.com.au](mailto:humelink@transgrid.com.au)

### Stay up to date with our work

Please head to [transgrid.com.au/HumeLink](https://transgrid.com.au/HumeLink) or scan the QR code to subscribe to regular updates, and for more information on the project.
