

# Powering Sydney's Future

## POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

### Underbore at Cooks River and Lees Park, Campsie / Ashbury

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable energy supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at [www.transgrid.com.au/psf](http://www.transgrid.com.au/psf).

Work to complete an underbore on **Cooks River and Lees Park, Campsie / Ashbury**, is due to start from week starting **Monday, 30 November 2020** and will take around seven weeks, weather and ground conditions permitting.

We will set up three work areas, including one on Lindsay Street, Harmony Street and Hay Street (see map overleaf).

#### Work activities

- > Installing temporary fencing and safety barriers.
- > Tree trimming as required to create a safe distance from plant and equipment (conducted by a trained arborist).
- > Drilling under the road using a drill rig.
- > Excavating a pit.
- > Assembling and then pulling conduits (plastic pipes) through the underbore.
- > Digging a trench about two metres wide using an excavator and installing conduits (pipes) in the trench.
- > Temporarily restoring the road surface to allow normal traffic flow.

Our team will return at a later date to undertake trenching work along Lindsay Street and Harmony Street. Permanent restoration of the road and any impacted areas will take place after the new cable has been pulled through. We will write to you again before these next stages of work.

#### Work hours

The work will be carried out on day shifts, **Monday to Sunday, from 7am to 6pm**.

#### How will the work affect you?

- > There will be intermittent road closures to through traffic on Harmony Street while pipes are installed. Traffic detours and control will be in place for the safety of workers and road users.
- > No right turn from Dunstan Street into Hay Street (refer to page 3 for specific traffic impacts).
- > The work will generate some noise, which we will make every effort to keep to a minimum.
- > There will be a temporary loss of street parking of around 260 metres while work is in progress.
- > There will be temporary lane closures to ensure the safety of workers, road users and residents. Traffic control will be in place to safely direct traffic around the site.
- > Road users may experience temporary delays in accessing local properties.
- > If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.

#### Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at [psf@transgrid.com.au](mailto:psf@transgrid.com.au).

## Location of work sites

## Access changes to residential properties

Because we will be working in the middle of the street, there will be changes to the way residents on **Cheviot Street** and **Hay Street, Ashbury** can access their properties for the duration of the works.

- > Residents at **66 Cheviot Street** and **72 to 100 Hay Street, 77 to 95 Hay Street** and **99 to 111 Hay Street** will only be able to turn left out of their driveways for the duration of the works.
- > Residents at **66 Cheviot Street** and **72 to 100 Hay Street** will need to access from the Cheviot Street end and will only be able to turn left into their driveways.
- > Residents at **77 to 95 Hay Street** and **99 to 111 Hay Street** will need to access from Harmony Street end and will only be able to turn left into their driveways.

### COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific access protocols at our work sites.
