

Work Notification | July 2025

Upcoming work at Kunama

REF: HLW-050

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections. The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in joint venture as the HumeLink West JV.

About the work

We are continuing enabling work at Green Hills Access Road, Kunama for construction of the Green Hills accommodation facility and compound. This enabling work is expected to be completed in October 2025. When completed, the facility will be used for plant servicing, fuelling activities, concrete production, storing materials and equipment temporarily, offices, worker accommodation, amenities and parking.

New and continuing work activities include:

- Delivering accommodation building modules and equipment to site
- Installing foundations, walkways, connecting utilities including plumbing, power, and telecommunications
- Building site access points, including new turning lanes on Green Hills Access Road
- Vegetation clearing, excavation and earthwork.
- Installing amenities, fencing, signage and barriers
- Facility equipment testing and operation
- Survey, investigation and monitoring, including drone and aerial photography

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government Major Projects website planningportal.nsw.gov.au/major-projects/projects/humelink.

What you can expect

There will be an increased number of construction vehicles across the project area during our work. The type of plant and equipment you can expect to see at this stage of construction are vacuum extraction vehicles, compaction rollers, excavators, bobcats with attachments, drone cameras, heavy and light vehicles.

Machinery and equipment may generate dust, noise and vibration. We will make every effort to minimise impacts by:

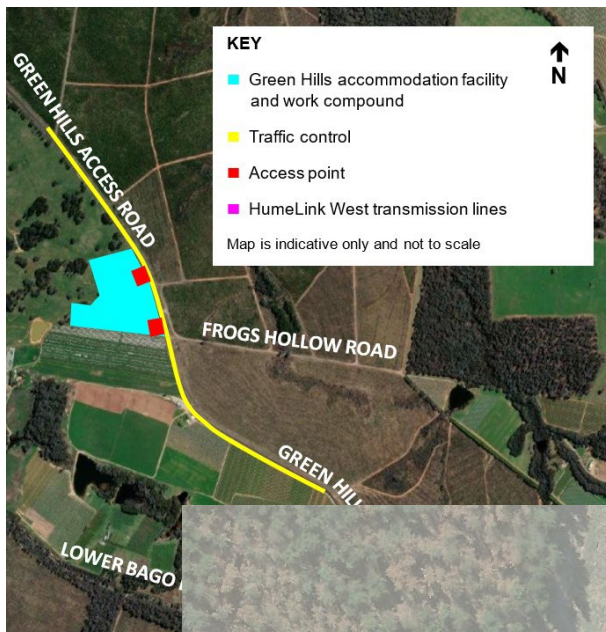

- Minimising the number of machines/vehicles to be used
- Ensuring all machinery and vehicles are maintained and serviced
- Turning off machinery and vehicles when not in use
- Fitting equipment with devices to minimise noise
- Using water carts, stabilising stockpiles and reducing speed on unsealed roads to suppress dust
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.

Work to install a safe access point will start from **Wednesday 16 July 2025**. The work will include reducing the speed limit for a section of Green Hills Access Road to 40 km/hr during the day and 80 km/hr at night for three months. When the access point and turning lanes are completed, the speed limit for this section of road will be 60 km/hr day and night. When the project is completed, speed limits will be restored to 80 km/hr day and night.

Traffic control will be in place when required to assist road users including temporary traffic lights, boom gates, signage, speed reductions and stop/slow traffic management. Please keep to the signposted speed limits, follow the direction of traffic controllers, and drive to the conditions such as slowing down in wet weather and poor visibility. For the latest traffic updates, visit livetraffic.com or download the app Live Traffic NSW.

When we are working

Work will take place **7am to 6pm, Monday to Sunday including public holidays**.

Where we will be working

Work will take place at Green Hills Access Road, Kunama shown in the map at left.

Temporary traffic changes are in place to build dedicated right-in and left-out lanes to the work facility. See the map below for the finished lane configuration.

Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning that might impact you. If you have questions about any of the above, please contact our Community and Stakeholder Engagement team on 1800 317 367 or humelink@transgrid.com.au.

We welcome your feedback on the HumeLink West JV Community Communications Strategy. Visit transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs to view the strategy, and connect with us to have your say.

Stay up to date with our work

Please head to transgrid.com.au/HumeLink or scan the QR code to subscribe to regular updates, and for more information on the project.

Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.
