

Work Notification | March 2026

Steel deliveries to Gadara and Windowie

HumeLink is one of NSW largest energy infrastructure projects, with about 365 kilometres of new 500kV transmission line which will connect Wagga Wagga, Bannaby and Maragle. The eastern portion between the existing Bannaby substation and Wondalga is being delivered by Acciona Construction Australia Pty Ltd and Genus Infrastructure (NSW) Pty Ltd in a joint venture as AG JV HumeLink East.

Tower steel deliveries in the Windowie and Gadara area

Convoys of heavy vehicles are underway to deliver steel components of transmission towers for HumeLink East. From **early March**, we will be delivering steel to sites near Windowie and Gadara in the Snowy Valleys. We are also continuing work to construct access points, tracks and foundations.

What to expect

During construction, there will be increased heavy vehicle and semi-trailer movements as steel components are delivered to site so towers can be assembled and erected.

Deliveries to sites near **Windowie** and **Gadara** will take place between **March and late April 2026**.

B-double and/or semi-trailers with prime movers will travel from Sydney and along the Hume Highway to tower site locations. There may also be stopping points where individual trailers are transferred before being delivered to tower sites. Up to eight trailers of steel will then be delivered across different sites each day.

- **Work hours:** construction works take place during daylight hours:
 - 7:00am to 6:00pm Monday to Friday and 8:00am to 1:00pm on Saturdays.
 - truck deliveries to and from Adjungbilly will take place between 7:00am and 5:30pm
 - if nightwork or out-of-hours work is required, we will contact all impacted landowners beforehand.

Traffic and Environment

- **Noise:** We will do everything we can to minimise any noise impacts such as turning off equipment and vehicles when they are not being used.
- **Additional vehicle movements:** The table below sets out the roads that will be used for steel deliveries to Windowie and Gadara.

Sydney to Gundagai	Hume Highway
Gundagai to Tumut	Snowy Mountains Hwy or Gocup Road
Windowie	Gadara Lane
Gilmore	Batlow Road

Upcoming construction activities

Once the steel has been delivered to site, teams will then begin work to assemble and erect the transmission towers.

• **Construction activity** in the area will include:

- the use of excavators and heavy machinery for earthmoving and clearing
- machinery and equipment generating dust, noise and vibration
- excavation with piling rigs to drill and prepare tower foundations
- concrete work and pouring to prepare tower foundations
- the use of large cranes to assemble and lift tower sections
- trucks delivering equipment and materials
- ongoing surveys and monitoring of biodiversity, heritage, noise, dust and vegetation including aerial surveys by drone.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government [Major Projects website](#) planning portal.

Example steel delivery near Adjungbilly

Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning which might impact you. If you have questions or concerns about any of the above, please contact our Community and Stakeholder Engagement team on **1800 317 367** or by emailing humelink@transgrid.com.au

Stay up to date with our work

Please head to transgrid.com.au/HumeLink or scan the QR code to subscribe to regular updates, and for more information on the project.

Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.
