

# Powering Sydney's Future

## POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

### Communications cable installation and joining on Seventh Avenue, Campsie

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at [www.transgrid.com.au/psf](http://www.transgrid.com.au/psf).

As part of the project, we have installed ancillary pits along the cable route that will be used for monitoring and control of the new electricity cable. The next stage of work in the area involves installing and joining fibre optic communications cable at the ancillary pits.

From **Saturday 19 June 2021**, work will start to install and join the communications cable at the ancillary pits on **Seventh Avenue, Campsie**. This work will take around **three weeks** to complete, weather permitting. Please refer to the map overleaf.

#### Work activities

- > Installing temporary fencing and safety barriers around the work site.
- > Tree trimming may be required to create a safe distance from plant and equipment (directed by a qualified arborist).
- > Lifting the lid off the ancillary pit at the start of the work, and lifting it back into place when work is finished.
- > Pulling communications cables through underground pipes at the ancillary pits.
- > Join communications cables together inside the ancillary pits.
- > Using a pump/vacuum truck to remove water as required.
- > Any localised nature strip restoration work that may be necessary.

#### Work hours

Working hours are **7am – 6pm, Monday to Saturday**.

#### How will the work affect you?

- > **Traffic on Seventh Avenue will be maintained** under traffic control.
- > There will be a temporary loss of street parking while the work is in progress.
- > The work will generate some noise, including use of a generator. We will make every effort to keep noise to a minimum.
- > If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.
- > Road users may experience temporary delays to access local properties.
- > An alternative route will be provided wherever any diversions or temporary closures of pedestrian access are required.

## Location of cable work

## What's next

We will return to Seventh Avenue at a later stage to dig a trench to connect the electrical earthing system for the new cable, install and join communications cables at the joint bays, and to open up one of the two joint bays for testing and cleaning.

Once all work is complete in the area and the cable is tested, we will permanently restore the road surface.

## Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at [psf@transgrid.com.au](mailto:psf@transgrid.com.au).

### COVID-19 Safety protocols

The health and safety of our people, customers and the community and ensuring a reliable supply of electricity to NSW and the ACT are our highest priorities during the COVID-19 crisis.

TransGrid and our contractors, as a minimum, adhere to the recommendations of SafeWork NSW along with the advice of other state and federal authorities to effectively manage the risk of COVID-19 to workers and others in the work environment. This involves maintaining effective controls including social distancing, stringent hygiene and specific work planning and access protocols at our work sites.
