Chapter 7

Offer to connect

Once performance standards are approved and connection agreements negotiated, your Commercial Proposal Manager will issue an Offer to Connect.

If you wish to accept the offer to connect, execute the connection agreements (below) within the stated timeframe.

- The Network Connection Agreement will incorporate the agreed performance standards for each applicable technical requirement under Schedule 5.2, as well as the ongoing technical, commercial, operational and compliance obligations applying to the connection.
- The Project Agreement sets out the works that Transgrid will undertake to enable the connection.

Following execution of the Network Connection Agreement, you and Transgrid must jointly notify AEMO that a Network Connection Agreement has been executed in accordance with NER clause 5.3.7(g).

Once this stage is completed, the proposed connection will be considered as a committed plant in the NEM.
