

# Powering Sydney's Future

## POTTS HILL TO ALEXANDRIA TRANSMISSION CABLE PROJECT COMMUNITY NOTIFICATION

### Cable installation at Pile Street, Dulwich Hill/Marrickville

TransGrid is installing a new underground electricity cable from Potts Hill to Alexandria. The Powering Sydney's Future project will help ensure a safe, reliable and affordable electricity supply for Sydney's CBD and surrounding areas. You can view a map of the cable route at [www.transgrid.com.au/psf](http://www.transgrid.com.au/psf).

Further to our construction progress update delivered on 10 March, we are writing to provide you with information about work to install the underground cable between the two joint bays on **Pile Street**. This work will start from **Tuesday 23 March** and is expected to take up to three weeks to complete, weather permitting. Please refer to the map overleaf.

#### Work activities

- > Installing temporary fencing and safety barriers around the work site.
- > Tree trimming may be required to create a safe distance from plant and equipment (conducted by a trained arborist).
- > Digging a trench about two metres wide using an excavator and installing conduits (pipes).
- > Pulling electricity cable through underground pipes at joint bays in the road.
- > Using a pump/vacuum truck as required.
- > Any localised nature strip restoration work that may be necessary.

#### Work hours

Working hours are **7am – 6pm, Monday to Saturday**. Please note work will not be carried out over the Easter long weekend (Good Friday through Easter Monday).

#### How will the work affect you?

- > **Pile Street and Fairfowl Street will remain open to local residents under traffic control.**
- > **Pile Street and a section of Fairfowl Street will be temporarily closed to through traffic** during work hours as shown on the map overleaf. Traffic detours and traffic control will be in place for the safety of workers and road users.
- > **Pile Street and Fairfowl Street** will have traffic control in place to stop traffic at times for the safety of workers and road users.
- > The cable drum behind a large delivery truck is around 4.5 metres wide when stationary and six metres wide when in use. The truck will arrive before the morning peak time and turn off its engine until 7am. It will leave after cable hauling has ended.
- > The work will generate some noise, including a generator at each cable pulling pit, which we will make every effort to keep noise to a minimum.
- > There will be a temporary loss of street parking while work is in progress.
- > Road users may experience temporary delays in accessing local properties.
- > If we anticipate that your driveway access may be disrupted, we will inform you in advance and discuss arrangements.
- > An alternative route will be provided wherever any diversions or temporary closures of pedestrian and cyclist pathways are required.

## Location of cable work

## What's next

There will be a series of work in Pile Street until the end of June 2021. Please refer to the construction progress update delivered to you on 10 March and available on [www.transgrid.com.au/psf](http://www.transgrid.com.au/psf) for an overview of upcoming work activities. We will also keep you advised of upcoming work activities.

Once all work is complete in the area and the cable is installed and tested, we will permanently restore the road surface.

## Contact us

If you have any questions or concerns, please contact the Powering Sydney's Future project team on 1800 955 588 or at [psf@transgrid.com.au](mailto:psf@transgrid.com.au).

For an interpreter please call **131 450** and ask them to call TransGrid on **1800 955 588**. The interpreter will then assist you with translation.
