

Work Notification | December 2025

Work compound at Cullinga Park Lane, Tarcutta

REF: HLW-097

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections. The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in joint venture as the HumeLink West JV. View interactive map at transgrid.com.au/humelink#Project-map.

About the work

A work compound will be established at Cullinga Park Lane, Tarcutta following assessment and consultation with the nearby community in recent months. Pending final approvals, work to establish the compound will take place from early January 2026 to the end of March 2026.

The Cullinga Park Lane compound will support construction of access points, access tracks, transmission towers and lines. It will be used until the project is completed late 2027 for plant servicing and fuelling, temporary materials and equipment storage, stockpiling, partial assembly of tower components, concrete production, work office and amenities, parking and heavy vehicle deliveries.

All work would be carried out in line with the project [Conditions of Approval](#) available on the NSW Government Major Projects website planningportal.nsw.gov.au/major-projects/projects/humelink.

What you can expect

There will be an increased number of construction vehicles in the area during work hours. The type of plant and equipment you could expect to see at this compound are a concrete batch plant, portable buildings, generators, elevated work platforms, telehandlers, cranes, forklifts, water carts, water tanks, excavators, compactors, earth moving equipment, drone cameras, heavy and light vehicles.

We will make every effort to minimise impacts by:

- Minimising the number of machines and vehicles to be used
- Ensuring all machinery and vehicles are maintained and serviced
- Turning off machinery and vehicles when not in use
- Fitting equipment with devices to minimise noise
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.

Traffic control will be in place when required, this may include variable message signs, boom gates, signage, speed reductions and stop/slow traffic management. For the latest traffic updates, visit livetraffic.com or download the app Live Traffic NSW.

When we are working

Work will take place **7am to 6pm Monday to Sunday including public holidays**. Out-of-hours work will take place at locations where impacted properties and landowners have been separately notified. Environmental surveys including fauna and flora monitoring will be undertaken 24/7 to prepare for work and monitoring throughout construction.

Where we will be working

Work will take place at Cullinga Park Lane, Tarcutta shown in the map below.

Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning which might impact you. If you have any questions about the project, please contact our Community and Stakeholder Engagement team on **1800 317 367** or humelink@transgrid.com.au.

We welcome your feedback on the HumeLink West JV Community Communications Strategy. Visit transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs to view the strategy, and connect with us to have your say.

Stay up to date with our work

Please head to transgrid.com.au/HumeLink or scan the QR code to subscribe to regular updates, and for more information on the project.

Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.
