

Work Notification | December 2025

Steel deliveries for HumeLink East

HumeLink is one of NSW largest energy infrastructure projects, with about 365 kilometres of new 500kV transmission line which will connect Wagga Wagga, Bannaby and Maragle. The eastern portion between the existing Bannaby substation and Wondalga is being delivered by Acciona Construction Australia Pty Ltd and Genus Infrastructure (NSW) Pty Ltd in a joint venture as AG JV HumeLink East.

Tower steel deliveries are underway for HumeLink East

Convoys of heavy vehicles are underway to deliver shipments of steel components of transmission towers for HumeLink East. In **late 2025**, deliveries of steel began to sites along the project alignment and **will continue until October 2026**. These deliveries are essential to support the safe and timely delivery of the project.

What to expect

During construction, there will be increased heavy vehicle and semi-trailer movements. From **April 2026**, deliveries of up to **1,000 tonnes of transmission tower steel will occur fortnightly**.

B-double trucks with two trailers will travel from Sydney and along the Hume Highway to a stopping point where individual trailers will be transferred. Deliveries to tower sites will happen **daily with up to eight trailers a day**.

- **Work hours:** construction works take place during daylight hours:
 - 7am to 6pm Monday to Friday and 8am to 1pm on Saturdays
 - if nightwork or out-of-hours work is required, we will contact all impacted landowners beforehand
 - truck deliveries will take place between 7am and 6pm including on Saturdays and Sundays

Traffic and Environment

- **Additional vehicle movements:** there will be a noticeable increase in truck movements on local roads on delivery days. For more information, please see the [HumeLink East website](#)
- **Traffic Control:** temporary road signage will be in place, where required, to ensure the safety of all road users and pedestrians

Example of a tower steel delivery at Adjungbilly

Upcoming construction activities

Once steel is delivered to site, teams will then begin work to assemble and erect the transmission towers.

- **Construction activity** in the area will include:

- the use of excavators and heavy machinery for earthmoving and clearing
- machinery and equipment will generate dust, noise and vibration
- excavation with piling rigs to drill and prepare tower foundations
- concrete work and pouring to prepare tower foundations
- large cranes will be used to assemble and lift tower sections
- trucks delivering equipment and materials
- ongoing surveys and monitoring of biodiversity, heritage, noise, dust and vegetation including aerial surveys by drone.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government [Major Projects website](#) planning portal.

Register to receive SMS Alerts

To help keep you informed on what is happening in your area, we're offering the option to register for SMS Alerts to receive project updates and assist you with your journey planning. Scan the QR code to opt-in.

By opting in, you consent to the HumeLink East project delivery partners using your details to provide you with project updates and information related to the project.

Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning which might impact you.

If you have questions or concerns about any of the above, please contact our Community and Stakeholder Engagement team on **1800 317 367** or by emailing humelink@transgrid.com.au

Stay up to date with our work

Please head to transgrid.com.au/HumeLink or scan the QR code to subscribe to regular updates, and for more information on the project.

Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.

Traffic and Environment

The table below sets out the roads that will be used cross HumeLink East for steel deliveries.

Noise: We will do everything we can to minimise any noise impacts, such as turning off equipment and vehicles when they are not being used.
