Proposed work compound at Cullinga Park Lane, Tarcutta

REF: HLW-063

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections.

The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in joint venture as the HumeLink West JV. View our interactive map at transgrid.com.au/humelink#Project-map.

About the proposal

HumeLink West is proposing the use of an area at Cullinga Park Lane, Tarcutta as a work compound, to support construction activities in the area. We are seeking community feedback on the use of this location as a compound.

The proposed Cullinga Park Lane compound would support the construction of access points, access tracks, transmission towers and lines. It would be used until the project is completed in late 2027 for plant servicing and fuelling; temporary storage of materials and equipment; stockpiling; concrete production; worker offices and amenities; parking; and heavy vehicle deliveries.

Concrete production is proposed to be carried out at this compound, instead of the accommodation facility and compound at Mates Gully Road, Tarcutta.

All work would be carried out in line with the project <u>Conditions of Approval</u> available on the NSW Government Major Projects website <u>planningportal.nsw.gov.au/major-projects/projects/humelink</u>.

What you could expect

If approved as a construction compound, there would be an increased number of construction vehicles in the area during work hours. The type of plant and equipment you could expect to see at this compound are concrete batch plant, portable buildings, generators, elevated work platforms, telehandlers, cranes, forklifts, water carts, water tanks, excavators with attachments, compactors, earth moving equipment, drone cameras, heavy and light vehicles.

We would make every effort to minimise impacts by:

- Minimising the number of machines/vehicles to be used
- · Ensuring all machinery and vehicles are maintained and serviced
- Turning off machinery and vehicles when not in use
- Fitting equipment with devices to minimise noise
- Monitoring dust, noise and vibration to manage any potential impacts and change our work if required.

Traffic control would be in place when required, including variable message signs, boom gates, signage, speed reductions and stop/slow traffic management.

Working hours

Work would take place during standard construction hours of **7am to 6pm, Monday to Friday** and **8am to 1pm on Saturdays**. Out-of-hours work may also take place **7am to 8am and 1pm to 6pm on Saturdays** and **7am to 6pm on Sundays**, in consultation with affected stakeholders.

Where we propose to work

Work would take place at Cullinga Park Lane, Tarcutta shown in the map below.

What happens next

You are invited to provide your feedback on the proposal for a HumeLink West work compound at Cullinga Park Lane, Tarcutta by Friday 11 July 2025 by contacting us on **1800 317 367** or humelink@transgrid.com.au.

We will provide an update to the community if the proposal is to go ahead.

We welcome any questions you have on this proposal or any other aspect of the project.
