

Work Notification | July 2026

Gregadoo, Big Springs, Book Book, Keajura, Tarcutta, Humula and Oberne Creek

REF: HLW-127

HumeLink is one of Australia's largest energy infrastructure projects connecting renewable energy sources to the grid and helping to put downward pressure on energy prices. The project consists of 365 kilometres of 500 kV overhead transmission lines connecting Wagga Wagga, Bannaby and Maragle and is being delivered in two sections. The section between Wagga Wagga, Maragle and Wondalga is being constructed by UGL Engineering and CPB Contractors, working in a joint venture as HumeLink West.

What work is happening

Work is continuing for access points and tracks, road crossing hurdles, brake and winch pads, towers foundations, tower assembly, and transmission line cable stringing through to project completion in late 2027. Activities include:

- Excavating and piling for the tower foundations
- Tower base construction, including steel reinforcement and concrete pours
- Assembling and lifting the towers using cranes
- Vegetation clearing, excavation and earthwork for hurdle pads, and brake and winch pads
- Stringing transmission line cables across the towers using drones and helicopters
- Transporting machinery and supplies
- Surveys, investigation, monitoring of biodiversity, heritage, noise, dust and vegetation
- Drone photography
- Equipment testing and operation.

All work will be carried out in line with the project [Conditions of Approval](#) available on the NSW Government Major Projects website planningportal.nsw.gov.au/major-projects/projects/humelink

What you can expect

There will be increased number of vehicles and machinery across the project area.

Equipment used includes generators, elevated work platforms, telehandlers, piling rigs, concreting trucks, cranes, forklifts, water carts, excavators with attachments, compactors, earth moving equipment, drones, helicopters, drone cameras, heavy and light vehicles.

We will make every effort to minimise and manage impacts by:

- Minimising machines and vehicles used, ensuring they are maintained, turning them off when not in use, and fitting devices or shielding to minimise noise
- Monitoring dust, noise and vibration and changing our work if required.

Temporary traffic changes

Temporary traffic changes will continue at Boiling Down Road, Ashfords Road, and Livingstone Gully Road for the road hurdle structures to be built over the roads. The hurdles will allow the transmission line cables to be pulled over the road, with little disruption to traffic flow.

In the coming months, more road hurdles will be built at Ivydale Road, Angels Lane, Big Springs Road, Tumbarumba Road, Keajura Road, the Hume Highway, Comatawa Road, Wilds Road, Humula Road and Westbrook Road.

Traffic control will be in place during this work, and when the cables are being pulled over the roads. This includes temporary traffic lights, electronic message signs, boom gates, signage, speed reductions and stop/slow traffic management. Please keep to signposted speed limits, follow directions of traffic controllers, and drive to the conditions such as slowing down in wet weather and poor visibility. For latest traffic updates, visit livetraffic.com or download the app Live Traffic NSW.

When we are working

Standard working hours are 7am to 6pm, Monday to Friday and 8am to 1pm on Saturdays.

Work out of these hours will take place at locations where impacted properties and landowners have been separately notified.

Environmental surveys including flora and fauna monitoring will be undertaken 24/7 throughout construction

Where we are working

Work will be between access points and the transmission line, as shown in the map over the page. See the full interactive project map for all work locations at transgrid.com.au/humelink#Project-map.

Keeping you informed

We'll continue to keep you updated about the project and let you know of any work we're planning which might impact you. If you have any questions about the project or want to provide feedback, please contact our Community and Stakeholder Engagement team on **1800 317 367** or humelink@transgrid.com.au.

We also welcome your feedback on the HumeLink West JV Community Communications Strategy. Visit transgrid.com.au/humelink-west/#Strategies-Plans-and-Programs to view the strategy and connect with us to have your say.

Stay up to date with our work

Please head to transgrid.com.au/HumeLink or scan the QR code to subscribe to regular updates, and for more information on the project.

Connect with us

Transgrid is committed to working with landowners and communities through the development of HumeLink. Please connect with us for more information.
