

## Required Approvals

The Applicant is required to secure all environmental approvals required for the IUSA to be constructed and operated for the expected life of the Connection Agreement. This may include but is not limited to:

- Obtaining all aboriginal and cultural heritage approvals (including any necessary aboriginal heritage management plan)
- Obtaining all native vegetation approvals
- Identifying and satisfying all requirements of the Office of Environment and Heritage in NSW (or its successor or replacement departments) (including the approval of any necessary environmental or biodiversity management plans)
- Any approval or exemption required under the Commonwealth Environment Protection and Biodiversity Conversation Act

Refer also to the Development Approval (Generic) item that has also been published on TransGrid's website. TransGrid publishes this information under clause 5.2A.5 of the National Electricity Rules.
